About PSI Global Ltd

The Company:

PSI Global manufactures and provides solutions for filters and separators to the compressed air and vacuum industries. We have sales offices and distribution warehouses located in Europe, North America and the Far East to support our clients' global operations.

With over 40 years experience and multiple international patents, the company has established itself as a market leader in the field of filtration and separation technology.

PSI Global is the only company in the industry with its own media manufacturing facility and the company's patented moulded separators are the most efficient and technically advanced in a variety of applications.

We manufacture the following products:

- In-line filters
- Filter silencers
- Separators for vacuum pumps
- Separators for screw and rotary vane compressors
- Retrofits for a wide range of OEM equipment

PSI Global Limited also incorporates 3 separate divisions:

- ChlorGuard emergency valve shutoff equipment which is manufactured in the UK and sold worldwide through a series of distributors. This equipment is heavily used in the water industry where Chlorine gas is used for disinfection.
- GassGuard emergency pipeline/valve shutoff equipment which is manufactured in the UK and sold world wide through a series of distributors. This brand of equipment is used for other industrial gases other than Chlorine such as Ammonia, Sulphur Dioxide, and Hydrogen Sulphide amongst many others. We predominantly look to work with the industrial packaged gas companies such as BOC, Air Products, and Messer amongst others.
- PSI Plastics injection moulding and tool making specialists. The purpose built UK manufacturing base has invested in new rigs and efficient capital equipment, alongside tool design, plastic injection moulding and precision engineering facilities.
